Introduction

What does it do?

– The extension includes a new Backend Module in the WEB Module to list and edit the page comments of the Extension "comments".

Users manual

- Just install the extension from the TYPO3 Extension Repository and your done.

- A new backend module should appear at the bottom of the WEB module. If not, try clearing the cache and logout / login.

- This is basically it ;)

- You gut some options in the module itself so go try them out (sorting, etc.)

Configuration

– You can configure some settings via Backend Configuration. Just go to the extension manager and click on the extension. There you can set, how much records should be displayed, when you are in the backend module itself. You can also set, how much more comments are displayed if you click on the link "Show more comments". Last but not least, you have the possibility to set the crop of the comment view in the backend.

– Just try out, what options are best for you. ;)

Known problems

– None so far. Contact me, if you notice something. ;)

To-Do list

– Contact me :)

– I'll work on the extension, as my time allows me...

ChangeLog

– v.0.0.1: Initial Upload
